you learn. Discover
your strengths.
Build your future.

Every
learner is
different.

Discover Your Learning Style

A practical guide to help you **understand** how you learn best,
explore your strengths and discover new ways to **succeed**.

UNDERSTAND YOUR BRAIN

Learn how your
brain takes in
information.

EXPLORE YOUR OPTIONS

Discover pathways
that fit who you
are and what you
enjoy.

BUILD CONFIDENCE

Use strategies
that help you
study smarter,
not harder.

GROW YOUR STRENGTHS

Focus on what
you're good at –
and keep growing.

CREATE YOUR FUTURE

Make choices
today that lead to
a brighter future.

Discover Your Learning Style

UNDERSTANDING HOW YOU LEARN BEST

Have you ever found yourself thinking...

"Why does everyone else seem to understand this so easily?"

"Why can't I remember what I've studied?"

"Maybe I'm just not academic enough..."

You're certainly not alone.

The truth is, there is no such thing as a brain that can't learn.

There are simply different ways that people process information.

Some people think in pictures. Some remember conversations.

Some need to write everything down. Others learn best by doing.

Once you understand how your brain naturally learns, studying becomes less frustrating, confidence begins to grow, and learning becomes something you can enjoy rather than fear.

This guide will help you discover your preferred learning style, recognise your strengths and explore practical study techniques that make learning work for you.

Because success doesn't come from learning like everyone else. It comes from understanding yourself.

“

“Education is not the filling of a bucket, but the lighting of a fire.”

WILLIAM BUTLER YEATS

Angela's Insight

Over the last twenty years, I've met countless young people who believed they weren't capable because school felt difficult.

Almost without exception, they weren't struggling because they lacked ability. They were struggling because no one had ever helped them discover how they learn best.

One of the most rewarding moments in coaching is seeing a young person realise that nothing is "wrong" with them – they simply learn differently.

Understanding your learning style doesn't just change how you study. It can change how you see yourself.

There is
no one right
way to learn.
There is only
your way.

CHAPTER 1

What Are Learning Styles?

UNDERSTANDING THE DIFFERENT WAYS WE LEARN

The human brain is incredible – but it doesn't work the same way for everyone. Learning styles are the different ways people take in, process, understand and remember information.

Some people learn best when they see something. Others learn best when they hear it. Some need to read and write things down. Others need to move, touch and experience to understand.

These preferences are not about intelligence. They are simply the natural ways your brain is wired to learn.

Understanding your learning style helps you study smarter, not harder. It helps you use techniques that support your strengths instead of fighting against them.

The more you understand how you learn, the more confident, motivated and successful you will become – in school, in life and in your future career.

When you learn in a way that suits you, everything becomes easier.

“

“When a flower doesn't bloom, you fix the environment in which it grows, not the flower.”

ALEXANDER DEN HEIJER

Angela's Insight

For years I believed that working harder was the answer. What I now know is that working in a way that suits your brain is what creates real change.

Learning styles are not about labels. They are about understanding – and using that understanding to unlock your potential.

Learning
begins with
understanding
yourself.

CHAPTER 2

The Four Main Learning Styles

UNDERSTANDING THE DIFFERENT WAYS WE LEARN

Over the years, educators and psychologists have identified four main ways people learn best. Most of us use a combination of these styles, but usually have one or two that we naturally prefer.

Understanding these styles can help you:

- ✓ Recognise your strengths
- ✓ Find study techniques that work for you
- ✓ Improve your confidence
- ✓ Learn more effectively and with less stress

The four main learning styles are:

VISUAL

You learn best when you see information in pictures, diagrams, charts or videos.

AUDITORY

You learn best when you hear information through listening, discussion or explanation.

READ/WRITE

You learn best when you read and write things down – lists, notes, words and text.

KINAESTHETIC (TACTILE)

You learn best when you do things, move, touch and experience ideas hands-on.

“

*Tell me and I forget.
Teach me and
I remember.
Involve me and
I learn.”*

BENJAMIN FRANKLIN

On the following pages, we'll explore each style in more detail – including strengths, challenges and practical study strategies that can make learning work for you.

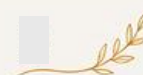

There is no best learning style. There is only the best way for YOU to learn.

Angela's Insight

I often meet young people who believe they are not good at learning because traditional methods don't work for them. When we discover their learning style, everything changes. They stop fighting themselves and start using strategies that suit their brain. That is when confidence grows – and learning becomes possible.

**You are not here to learn in the same way as everyone else.
You are here to learn in YOUR way.**

See it.
Understand it.
Remember it.

CHAPTER 3

Visual Learners

LEARN BEST BY SEEING

Visual learners understand and remember information best when they can see it. They think in pictures, notice details and often have a strong imagination.

STRENGTHS

- Strong memory for images and diagrams
- Notice details others miss
- Good at reading maps, charts and graphs
- Creative and imaginative

CHALLENGES

- May struggle to remember things just by listening
- Can get distracted by visual detail
- May take longer to take notes

STUDY TIPS

- Use mind maps and diagrams
- Highlight key information
- Use colour to organise notes
- Watch videos and visual explanations

SUBJECTS THEY OFTEN ENJOY

- Art & Design
- Geography
- Science
- Architecture
- Graphic Design
- Engineering
- Film & Animation

“

The best thing about a picture is that it never changes, even when the people in it do.”

ANDY WARHOL

SIGNS THIS MIGHT BE YOU

- ✓ You prefer pictures, diagrams or videos over long explanations.
- ✓ You use colours, symbols or doodles when you study.
- ✓ You remember where things are on a page more than the words.
- ✓ You enjoy drawing, design or creative activities.
- ✓ You find it easier to understand maps, charts and graphs.
- ✓ You often “see” the big picture.

Angela's Insight

Visual learners often doubt themselves because school doesn't always teach in a visual way. But when they use pictures, colour and visual tools, their confidence grows quickly.

Your brain is designed to learn in your own unique way.
When you embrace that, learning becomes clearer and more enjoyable.

Hear it.
Discuss it.
Understand it.
That's how
I learn.

KEY POINTS

- Listen
- Understand
- Remember
- Explain

DISCUSS
SHARE
DEBATE
LEARN

Talk it
through

CHAPTER 4

Auditory Learners

LEARN BEST BY HEARING AND LISTENING

Auditory learners understand and remember information best when they hear it. They learn well through listening, speaking and discussing ideas with others.

STRENGTHS

- Good listening skills and attention
- Remembers spoken information well
- Enjoys discussions and debates
- Good at explaining things to others
- Picks up tone, pace and meaning in conversations

CHALLENGES

- May struggle with reading long texts
- Can be distracted by background noise
- May need information repeated
- Might prefer talking over writing
- Can forget important details if not spoken about

STUDY TIPS

- Listen to podcasts, audiobooks or explanations
- Record key points and listen back
- Discuss topics with friends or family
- Read information out loud
- Teach someone else what you've learned

SUBJECTS THEY OFTEN ENJOY

- Music
- Languages
- Drama
- History
- Psychology
- Politics
- Radio & Broadcasting
- Teaching

“

“The art of communication is the language of leadership.”

JAMES HUMES

SIGNS THIS MIGHT BE YOU

- ✓ You prefer listening to reading.
- ✓ You enjoy discussions and group conversations.
- ✓ You remember spoken information more easily than written.
- ✓ You like music, songs or spoken stories.
- ✓ You benefit from talking things through.
- ✓ You often “hear” the answers in your head.
- ✓ You learn well from verbal instructions and explanations.

Angela's Insight

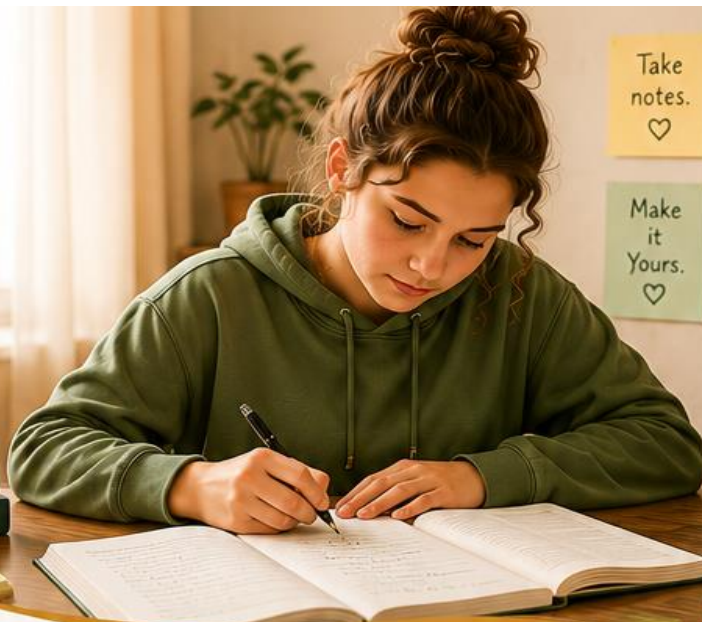

Auditory learners often think deeply and enjoy meaningful conversations. They may not always shine in traditional written assignments, but they have a powerful way with words and ideas.

When they are encouraged to speak, listen and share, they build confidence and their true potential emerges.

Read it.
Write it.
Understand it.
Remember it.

Reading/Writing Learners

LEARN BEST BY READING AND WRITING

Reading/Writing learners understand and remember information best when they see words and put their thoughts into written form.

They enjoy reading, taking notes and expressing ideas through writing. Words help them think, organise their ideas and make sense of new information.

STRENGTHS

- Enjoys reading and written information
- Strong vocabulary and spelling
- Good at expressing thoughts in writing
- Learns well from text and handouts
- Organised and detail focused

CHALLENGES

- May get tired of listening for long periods
- Can become too focused on words and miss the big picture
- May spend a long time perfecting written work

STUDY TIPS

- Take clear, organised notes
- Summarise what you read
- Use lists, outlines and bullet points
- Write things in your own words
- Use flashcards with key words

SUBJECTS THEY OFTEN ENJOY

- English / Language
- History
- Law
- Journalism
- Psychology
- Languages
- Business

“

Words have the power to both destroy and heal.”

RUPI KAUR

SIGNS THIS MIGHT BE YOU

- | | |
|---|---|
| <ul style="list-style-type: none"> ✓ You enjoy reading books, articles and stories. ✓ You like writing notes and lists. ✓ You remember things better when you read them. ✓ You enjoy spelling, vocabulary and word games. | <ul style="list-style-type: none"> ✓ You prefer written instructions to verbal ones. ✓ You like expressing your ideas in writing. ✓ You enjoy using planners and written organisers. ✓ You often highlight, underline or make notes when reading. |
|---|---|

Angela's Insight

Reading/Writing learners often feel most confident when they can read, reflect and express their thoughts on paper. Writing helps you organise your ideas and strengthens your understanding.

Your words matter. They help you learn, communicate and make your ideas come to life.

Move it.
Do it.
Feel it.
Remember it.

Kinesthetic Learners

LEARN BEST BY DOING AND EXPERIENCING

Kinesthetic learners understand and remember information best when they are actively involved. They learn by doing, moving, touching and experiencing.

They enjoy hands-on activities, real-life situations and physical movement. When they can try things out for themselves, learning becomes more meaningful and easier to remember.

STRENGTHS

- Learns well through movement and activity
- Good coordination and practical skills
- Strong problem solver
- Enjoys real-life experiences
- Remembers by doing rather than watching or listening

CHALLENGES

- May find sitting still and listening for long periods difficult
- Can become restless in traditional lessons
- May prefer action over reflection
- May forget details if not actively involved

STUDY TIPS

- Use hands-on activities whenever possible
- Take breaks and move around
- Create models, projects or experiments
- Act things out
- Use role plays and simulations
- Study in short, active bursts

SUBJECTS THEY OFTEN ENJOY

- PE / Sports Science
- Dance
- Drama
- Engineering
- Mechanics
- Cooking / Nutrition
- Health & Fitness
- Outdoor Studies
- Practical Arts

“

*Tell me and
I forget.
Teach me and
I remember.
Involve me and
I learn.”*

BENJAMIN FRANKLIN

SIGNS THIS MIGHT BE YOU

- ✓ You like learning by doing and trying things out.
- ✓ You enjoy physical activity and movement.
- ✓ You find it hard to sit still for long periods.
- ✓ You like building, fixing or creating things.
- ✓ You prefer real-life examples over theory.
- ✓ You remember things better after hands-on practice.
- ✓ You enjoy experiments, practical tasks and projects.
- ✓ You like being outdoors and exploring.

Angela's Insight

Kinesthetic learners are often told to “sit still” or “be quiet” when they are simply learning in the way their brain is designed to learn. Movement is not a distraction for you – it’s a tool. It helps you focus, understand and remember.

Your energy, curiosity and love of action are powerful strengths. Keep moving, keep doing and keep discovering your potential.

Know
your style.
Use your
strengths.

Which Learning Style Is Most Like You?

THERE IS NO RIGHT OR WRONG ANSWER.
THIS CHECKLIST WILL HELP YOU DISCOVER YOUR STRONGEST STYLE.

Read each statement below and tick the box that best describes you.
Tick as many as you like – some may fit more than one style.

 VISUAL LEARNER	 AUDITORY LEARNER	 READING/Writing LEARNER
I remember things better when I see them. ☐	I learn best by listening. ☐	I enjoy reading books, articles and stories. ☐
I like using diagrams, charts or mind maps. ☐	I enjoy discussions and talking things through. ☐	I like taking notes and making lists. ☐
I notice details in pictures that others miss. ☐	I remember things when I hear them. ☐	I prefer written instructions over verbal ones. ☐
I enjoy drawing, doodling or being creative. ☐	I like listening to music, songs or podcasts. ☐	I enjoy writing stories, essays or journaling. ☐
I prefer videos or images over long explanations. ☐	I prefer someone to explain things to me. ☐	I like using words to express my ideas. ☐
I like using colour to organise my notes. ☐	I enjoy group work and sharing ideas. ☐	I remember things better when I read them. ☐
I can easily picture things in my mind. ☐	I can recall information from conversations. ☐	I enjoy dictionaries, glossaries and fact sheets. ☐
I enjoy design, layout and visual organisation. ☐	I like verbal instructions over written ones. ☐	I like clear, detailed written information. ☐

HOW TO COMPLETE:

- Read each statement carefully.
- Tick the boxes that feel most like you.
- It's okay to tick more than one style.
- Add up your total for each column.
- See your results at the bottom of the page.

I learn best by doing and trying things out. ☐
I enjoy hands-on activities and real-life experiences. ☐
I like moving around when I learn. ☐
I remember things better after I've done them. ☐
I enjoy experiments, projects and building. ☐
I find it hard to sit still for long periods. ☐
I like using my body and senses to learn. ☐
I prefer practical tasks over reading or listening. ☐

YOUR SCORE

VISUAL

 / 8

AUDITORY

 / 8

READING/Writing

 / 8

KINESTHETIC

 / 8

WHAT DO YOUR RESULTS MEAN?

HIGHEST SCORE: This is likely your strongest learning style. You learn best when information is presented in this way.

TWO HIGH SCORES: You probably use two learning styles equally. Try combining both for best results.

ALL SIMILAR: You are a flexible learner! You can adapt to different ways of learning.

LOWER SCORES: You can still learn using these styles – it may just take a little more effort. Use the tips in this workbook to support you.

Angela's Insight

You are unique, and so is the way you learn.
There is no "best" style – every style has strengths.
The key is understanding your preferences so you can use strategies that help you learn more easily, stay motivated and achieve your goals.

When you learn in the way that suits you, everything becomes possible.

*Different styles.
Different strengths.
Every learner
can succeed.*

How Learning Styles Impact Performance & Achievement

UNDERSTANDING YOUR STYLE HELPS YOU ACHIEVE MORE

Students learn in different ways, and when teaching and study methods match those preferences, performance improves and confidence grows.

The impact of learning styles can be seen across all subject areas and educational levels.

LEARNING STYLE	 VISUAL	 AUDITORY	 READING/ WRITING	 KINESTHETIC
HOW IT AFFECTS LEARNING	Learns best with images, diagrams, charts, videos and visual organisers.	Learns best by listening, discussing, and hearing information out loud.	Learns best through reading, note-taking, and written expression.	Learns best by doing, moving, touching and hands-on experiences.
STRENGTHS IN THE CLASSROOM	Notices details, patterns and relationships. Strong memory for what they see.	Remembers what they hear. Good at explaining ideas aloud.	Strong vocabulary and spelling. Enjoys writing and organising ideas.	Understands through action. Solves problems by trying things out.
IMPACT ON PERFORMANCE	Excels with visual materials and structured visual support.	Performs well in discussions, presentations and verbal tasks.	Achieves more with essays, written exams and research tasks.	Performs best with practical tasks, projects and real-world situations.
EXAMPLES OF SUBJECTS WHERE IT SHINES	Geography, Art, Design, Science, Mathematics (geometry), Architecture	Languages, Music, History, Drama, Debates	English, Literature, Law, Journalism, Business Studies	PE, Science (experiments), Engineering, Cooking, Construction
ACROSS EDUCATIONAL LEVELS	From primary to higher education, visual learners benefit from clear visual explanations.	They thrive in interactive learning, group work and verbal feedback at every level.	They build strong academic skills in reading and writing-intensive subjects.	They excel in practical courses, workshops, apprenticeships and experiential learning.

WHY IT MATTERS

- Improves understanding and retention
- Increases engagement and motivation
- Builds confidence and self-esteem
- Supports better exam performance
- Helps you choose strategies that work for you

HOW TO USE THIS KNOWLEDGE

- ✓ Identify your strongest learning style.
- ✓ Use strategies that match how you learn best.
- ✓ Combine styles when possible for even better results.
- ✓ Communicate your needs with teachers and tutors.
- ✓ Keep experimenting – what works today may change tomorrow.

“When a flower doesn’t bloom, you fix the environment in which it grows, not the flower.”

ALEXANDER DEN HEIJER

Angela's Insight

You are not a one-size-fits-all learner – and that’s a beautiful thing. Knowing your learning style helps you stop fighting against yourself and start working with your strengths.

The more you understand how you learn best, the more successful, confident and capable you become.

You don't
have to figure
it out alone.
Let's do it
together.

How Can Coaching Help You With This?

UNDERSTAND. EMBRACE. ACHIEVE.

Understanding your learning style is powerful – but knowing how to use it effectively is where real change happens. Coaching gives you the support, clarity and strategies to turn self-knowledge into success.

COACHING CAN HELP YOU:

DISCOVER YOUR STYLE

Identify your dominant learning style and how it affects the way you take in, understand and remember information.

USE YOUR STRENGTHS

Learn how to study, revise and tackle challenges in ways that suit you best – not just what works for others.

IMPROVE YOUR PERFORMANCE

When you learn in a way that works for you, you understand better, retain more and achieve better results.

BUILD CONFIDENCE

Understanding how you learn helps you feel more confident, capable and in control of your education.

OVERCOME CHALLENGES

Coaching helps you break down barriers, develop new strategies and stay motivated even when things get tough.

PLAN YOUR FUTURE

Use your learning style to make smarter choices about subjects, careers and the next steps that are right for you.

“

The beautiful thing about learning is that no one can take it away from you.”

B.B. KING

WHAT COACHING LOOKS LIKE

One-to-one conversations focused on you.

Practical strategies tailored to the way you learn.

Support to build habits, organisation and motivation.

Tools to manage stress, self-doubt and overwhelm.

Encouragement to celebrate progress and grow.

Guidance to make confident decisions about your future.

Angela's Insight

When you understand your learning style, you stop forcing yourself to learn in ways that don't fit. Coaching helps you unlock your natural strengths, create a plan that works for you and build the confidence to achieve your goals. **You have everything you need – and you don't have to do it alone.**

Ready to Discover Your Potential?

 Every young person deserves the chance to understand how they learn, where their strengths lie and what pathway is right for them.

At **More Than Points**, I work with teenagers and parents to build confidence, identify strengths and create a future that is based on potential—not pressure.

Whether you're feeling overwhelmed by subject choices, unsure about career options or simply looking for clarity, **coaching can help you move forward with confidence.**

I CAN HELP YOU WITH:

- ✓ Discovering your learning style
- ✓ Identifying your unique strengths
- ✓ Career and pathway exploration
- ✓ College, PLC and apprenticeship guidance
- ✓ Building confidence and motivation
- ✓ Goal setting and action planning
- ✓ Parent support and guidance
- ✓ Creating a personalised plan for your future

YOU ARE
FAR MORE
THAN YOUR
POINTS.

Angela's Final Message

“For over twenty years, I've worked with young people who believed they weren't capable enough. Time and time again, I've watched those same young people flourish—not because they suddenly became more intelligent, but because they finally understood themselves.

Every learner has strengths. Every learner has potential. Sometimes all that's needed is someone to help uncover it.

If this guide has helped you see yourself differently, then it has already achieved its purpose.

I would be delighted to help you take the next step on your journey.

Remember... you are far more than your points.
